

## IDEX 2011

### SELECTION PHASE

The grades A, B & C can be understood in the following way:

- A = good** : with minor corrections if necessary  
**B = acceptable** : substantial additional efforts are necessary  
**C = insufficient** : too far removed from the expected quality level.

Proposal
<b>Title of the proposal: UNITI</b>

Evaluation summary	Grade
1. Scientific power and intensity of the area	A
2. Scientific ambition	A
3. Attractivity and coherence of the teaching offer	A
4. Teaching: ambition and innovation	A
5. Economic partnerships, result exploitation and technology transfer	A
6. International and European policy	A
7. Governance credibility and efficiency	B
8. Governance: ambition, identity, transformation and structure	A
9. Quality of the roadmap, planning and associated milestones	A
10. Procedures and management	B
11. Resource allocation system	A
12. HR policy	B

The grades are the result of an assessment of the proposals, both written and oral, of the second phase of the second wave, and should not be related to those attributed during the previous phases of the call.

**Main positive points of the proposal:**

- **The structural innovation is the creation of colleges, especially Toulouse Tech.**
- **Governance is clarified and strengthened and now ready to support the institutional transformation. The roadmap has been significantly improved**
- **The diverse and deep areas of excellence (engineering, agronomy and life sciences) are assets.**

### **Global appreciation of the Initiative of Excellence**

**The file and the oral presentation demonstrate credible potential to reach the IDEX objectives within the four year target.**

### **Proposal of the jury**

**This proposal should be selected.**

### **Recommendations to the project bearers**

**Identify measurable milestones for the first phase of the transformation process.**

**Obtain commitments to fusion into an integrated university from its constituent partners by signing a binding charter before 2013.**

**Formal establishment of the proposed Toulouse Tech before 2013.**

**Continue exploring ways of strengthening the science base beyond the equipex / labex competition.**

### **Recommendations to the government**

**Monitor the progress achieved towards a new governance model, including meeting the roadmap milestones, through a mid-term review.**

**The NROs should formalize their commitment to prioritizing future hiring within IDEX perimeters.**
