

FORUM À LA CROISÉE DES SCIENCES : INTERAGISSEZ, IMAGINEZ, INNOVEZ.

Forum interdisciplinarité
9&10 janvier 2019
Hôtel de Région
Toulouse

Avec le soutien de

InHERA (Idex Transversalité 2014-2016) : Interactions Homme - Environnement dans les régions Arctiques

Alexei KOURAEV-LEGOS-OMP

Porteur : E. Zakharova. **Participants** (9 labos) : **AMIS** (E.Crubézy, C.Theves, P.Gerard, L.Romanova, D.Nikolaeva), **CNRM/GAME** (C.Delire, B. Decharme), **ECOLAB** (J-L.Probst, R.Teisserenc, L.Gandois, L.Lambs, M.Barret, T. Le Dantec), **GET** (J.Viers, L.Orgogozo), **LA** (D.Serça), **LEGOS** (E.Zakharova, A.Kouraev, F.Rémy), **CESBIO** (Y.Kerr, S.Bircher, A.Mialon), **LEREPS** (N. Gallai), **UMR831**(D.Texier)

The aim of the InHERA project was to establish the network and enhance the framework for studying the consequences of climatic and environmental changes in North Siberia on the human communities taking into account historical and modern aspects. The project included about 20 researchers and engineers of the OMP and CNRM-GAME (environmental sciences), AMIS (anthropobiology) and LEREPS (socio-economy)

Context:

CNRS-Russia GDRI CAR-WET-SIB (2014-17) “Carbon, Water and Metal Transport in Wetlands of Siberia”, biogeochemical (GET, ECOLAB, SIF, TSU, ISSA) and hydrological frameworks (LEGOS, TSU, GET)

CFSFR - French Siberian Center for Education and Research (Environment, Biosphere, Climatic change)

ANR CEP&S CLASSIQUE (2012-2016) “Climat, Agriculture and Siberian Society: which evolution?”

Various national and international projects

Reinforcing the network

- Workshops and meetings: 2015 with external participants from LAS (social anthropology) and NE Federal University, Yakutsk (socio-economics), 2016 (11 organisations from France, Germany and Russia)
- Conferences (LYON workshop 2015 – Lower Yenisey; ICOP Permafrost Potsdam 2016; EcoSummit "Ecological Sustainability: Engineering Change" 2016 etc)
- Joint field work (Yakutia, Western Siberia, Ynisey/Igarka, Baikal, Hovsgol)
- Publications and presentations (>30)
- Contacts with French embassy in Moscow, French permafrost association (AFDP), IBPC, YPI; exchange visits (N. Tananaev, A. Desiatkin)

« Man-Environment Interactions in the Arctic Regions »
« Interactions Homme-Environnement dans les Régions Arctiques »

IDEX Project InHERA:
Toulouse network of partners
on the themes :

Environment + Socio-economy + Anthropobiology

LEGOs, GET, LA,
ECOLAB, CESBIO, CNRM LEREPS AMIS

seminar and round table
04 Mars 2015 in OMP

Objectives:

- to know axes and actions of partners
- to establish interdisciplinary links
- to identify missing skills and potential partners
- to define future actions

AST Arctique => Toulouse Arctic Initiative

CESBIO, ECOLAB, GET, LA, LEGOS (OMP), AMIS, CLS,
CNRM-Game, CERFACS, Mercator

- Create a network of researchers from various scientific domains to facilitate data collection, use of tools, exchange of ideas and creation of new projects;
- Give visibility to studies done by OMP researchers and partner laboratories in Toulouse with the prospective to become a competitive Arctic center at national and international level.
- 3 themes: Permafrost (hydrology-vegetation-biogeochemical cycles); IDEX InHERA; Sea ice retreat and its consequences

<http://www.obs-mip.fr/recherche/actions-transversales/arctique>

The image shows the homepage of the Toulouse Arctic Initiative. At the top right is the logo "TOULOUSE ARCTIC INITIATIVE" with a globe icon. Below it is a subtext: "A scientific group conducting the research and teaching on arctic problems". The main text reads: "We investigate arctic terrestrial and ocean systems under the recent climate change to improve our understanding of human adaptation to environmental changes". The page is divided into three main sections with rounded blue corners: "Permafrost", "Arctic Ocean And Atmosphere", and "Arctic Environment And People". Each section contains a title, a brief description, and small thumbnail images. The "Permafrost" section includes Hydrology, Wetlands balance, Thermokarst lakes, Soil moisture, Freeze-thaw, Lake ice, Snow cover, and Runoff modeling. The "Arctic Ocean And Atmosphere" section includes Sea Ice, Snow cover, Ice freeboard, Ice thickness modeling, and Atmosphere (Polar low). The "Arctic Environment And People" section includes Human (Archaeological fields, Genomes and paleogenomes, Cold Adaptation and Evolution), Environment (Domestication, Infectious diseases, Nutrition), and a small image of people.

TOULOUSE
ARCTIC
INITIATIVE

A scientific group conducting the research and teaching on arctic problems

We investigate arctic terrestrial and ocean systems under the recent climate change to improve our understanding of human adaptation to environmental changes

Permafrost

Hydrology

Wetlands balance

Thermokarst lakes

Soil moisture

Freeze-thaw

Lake ice

Snow cover

Runoff modeling

Arctic Ocean And Atmosphere

Sea Ice

Snow cover

Ice freeboard

Ice thickness modeling

Atmosphere

Polar low

Arctic Environment And People

Human

Archaeological fields

Genomes and paleogenomes

Cold Adaptation and Evolution

Environment

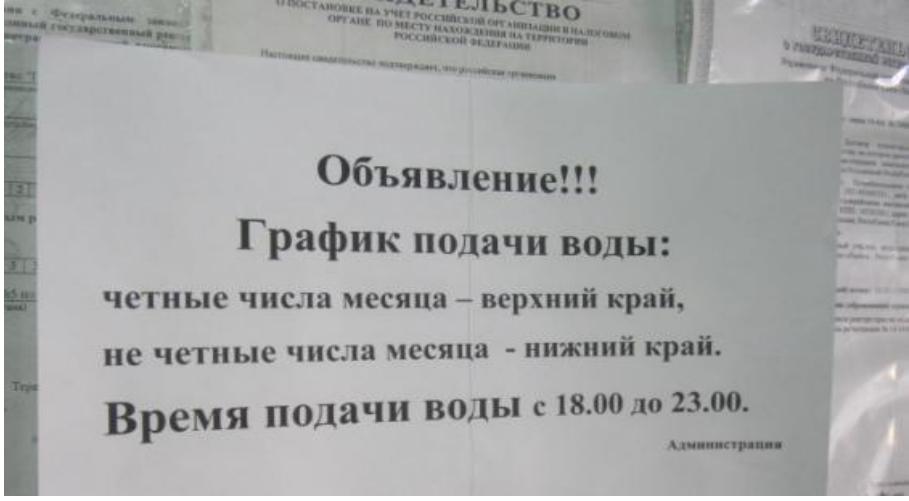

Domestication

Infectious diseases

Nutrition

LEGOs, ECOLAB, GET, CESBIO, LA, CNRM, AMIS, CLS, MERCATOR

Environment and society: access to water, pastures and abandoned fields, transport (river crossing, winter routes), fires etc.

Projects and evolution

- 3 PhD (AMIS, IDEX + French Embassy in Moscow)
- FP7 TOMCAR Permafrost (2012-2016, ECOLAB)
- TOMCAR-SAT (EC2CO)
- JPI Climate SIWA "Siberian Inland Waters" (GET)
- BIO-CLIM-LAND center and journal at TSU
- FP7 MERCURY Isotopes (GET)
- ANR PROMETHEUS (2013-2016, GET)
- PARCS: Pollution in the Arctic Systems (Chantier Arctique)
- CNES Permasensing (LEGOS, M2C, IBPC)
- APT (Acceleration of Permafrost Thaw By Snow) BNP Paribas (CNRM-Game)
- ERALECC (2016-2018) “Eurasian Lakes in a changing climate” ERA.Net RUS Plus S&T
- CNRS-Russia IRN “TTS – Toundra to Steppe” (2020-2023), under construction
- New contacts, new cooperation, new field work, new ideas
